

NOW...ENTERING AND EXITING YOUR POOL WILL BECOME
EASY FOR PEOPLE OF ALL AGES WITH A...

MEDALLION LINER STEP

This 14 gauge, fully assembled, galvanized steel step was designed to be sold on liner replacement jobs to those customers who never had a set of built in steps and prefer that their existing concrete or wood deck is not disturbed. The average installation time for these liner covered steel steps is only 30 minutes,

This step can also be installed on new pools where the yard conditions won't allow for recessed steps or where the customer prefers a walk in step rather than a recessed step.

To find out more about these new and exciting built in steps contact your local Medallion dealer or call Medallion.
